🌟 Professional Summary

Senior iOS Engineer with 7+ years of experience designing scalable mobile solutions, recently leading feature development for the **Wells Fargo** iOS app (serving millions of users). Expert in modernizing legacy codebases: migrated critical flows from WebViews to **SwiftUI**, and led the adoption of **GraphQL/Apollo** to optimize network layers. Proven track record of mentoring teams and delivering accessible, high-performance apps.

🔍 Target Role & Technical Focus

Target Role: Senior iOS Engineer / Mobile AI Integrations / Swift Specialist

Technical Focus: Mobile UX, SwiftUI, GraphQL, Accessibility, On-device AI integration, Combine

👛 Work Experience

Senior iOS Engineer (Contract via Enhance IT) Wells Fargo Bank – San Francisco Bay Area, CA - USA - Sep 2022 – Jan 2025

(Recommendation letters available upon request)

- Collaborated onsite at Wells Fargo's **Silicon Valley** hubs (Fremont/San Leandro) to lead development of new native features for the Wells Fargo iOS banking app, impacting millions of daily users.
- Spearheaded the migration of legacy WebView components to fully native **Swift/SwiftUI** implementations, significantly improving app performance and user experience.
- Pioneered the integration of the **Apollo CLI** to modernize the API layer with **GraphQL**; was the first in the team to implement this architecture in production.
- Delivered inclusive and accessible UIs compliant with strict banking QA standards (VoiceOver, Dynamic Type, external keyboard support).

- Collaborated closely with Android, QA, Backend, and Design teams in an Agile Scrum environment to deliver bi-weekly sprints.

iOS Developer Consultant (Bootcamp & Training) Enhance IT

Atlanta, Georgia, USA

Jun 2022 – Aug 2022

- Completed an immersive, high-intensity iOS development bootcamp focused on advanced **SwiftUI, Combine**, and enterprise architectural patterns (MVVM-C, VIPER).
- Received specialized training in soft skills and effective communication for U.S. corporate environments.
- Prepared for client deployment through rigorous technical assessments and mock projects similar to large-scale banking apps.

Full Stack Developer

Dataware Solutions S.A de C.V — Querétaro, México

Mar 2022 – May 2022

(Recommendation letters available upon request)

- Built a mobile app to manage warehouse inventory via QR scanning. Implementing new flows and features by design and implementing an entire process for specific client situations (free hands while working, bluetooth bar code scanner accessory). Android, .NET API backend, SQL Server, Stored Procedures, Bluetooth communications at warehouse.
- Designed SQL procedures for operational reporting and analytics.
- Android native mobile application. Mobile, Android, APKs, Java, API integration, .NET Core backend.

IT department Coordinator

Eninetworks - Querétaro, México

08/01/2021 - 06/01/2022

(Recommendation letters available upon request)

- Managed projects throughout their lifecycle, including communications with product owners, resources management and architecture design across the country.
- Standardized code and implemented quality testing protocols for development projects.
- Mentoring new engineers and taking the role as scrum master to organize current projects, scope and milestones over the year.

Full Stack Developer

Eninetworks - Querétaro, México

07/01/2019 - 08/01/2021

- Developed administrative systems and communication tools, managed servers, and databases. .NET, C# .NET Core, IIS, SQL SERVER, POSTGRES, Java, APIs integration, API Development, Swagger API, Networking layer, SSH Communications.
- Coordinated team members, project requirements, and development tasks using a variety of tools and languages.
- Led development of internal systems, databases, and server infrastructure.

Java/Spring Full Stack Developer

Universidad Autónoma de Querétaro

Feb 2018 – Sep 2018

- Built Java Spring web tools for university scholarship and staff management. HTML 5, JSP files, JavaScript, WildFly server, Postgres DB, DB Beaver, Java/Spring framework, CSS, Mobile and desktop UI design, Responsive design.
- Mentor new engineers and support existent projects at on going development.
- Attending continuous tasks for automatic and manual CI/CD. GitLab, Git, App Deploy using WildFly server, Postgres DB backup and restore.

Software Developer

BinaryCode Systems S.A de C.V

Jan 2017 – Sep 2017

- Developed custom web/mobile apps for SMEs using .NET framework, Xamarin (iOS, Android).
- Desktop application for vegetable production line workers. Using QR codes with Zebra printers and Barcode scanners we use a desktop application to register tons of products in a realtime active production line. Desktop, C#, Win forms, Barcode scanner, Zebra printers, SQL Server, DB Reports, Analytics, Data science of production, .NET.
- Fireman dev, fixing iOS features for an existent private application. Fixing bugs and polish business flows through existent project. iOS, Swift, UIKit, SwiftUI.

Education

Bachelor's Degree in Computer Engineering

Universidad Autónoma de Querétaro – Graduated: Jul 2019

Focus on Software Engineering, Systems Architecture, and Data Structures

Certifications & Courses

- Course on AI & Deepfake – Mphasis (July, 2024)
 - Information Security Awareness Course - Mphasis (Jun, 2024)
 - Data Privacy Awareness Course - Mphasis (Jun, 2024)
 - Code of Business Conduct - Mphasis (Dec, 2023)
 - Data Privacy Awareness Course - Mphasis training (Oct, 2022)
 - iOS Development Bootcamp – Enhance IT (Jun, 2022)
 - Web Development Diploma – UAQ (Jun, 2019)
 - Django / Python Programming – UAQ (Jan, 2019)
 - Multiple certifications and courses
- https://drive.google.com/drive/folders/1Zu5Hgb2uKPP0uxEgMG_iGzjmVUfGJve-?usp=drive_link
-

Technical Skills

Mobile Development (iOS)

- Swift, SwiftUI, UIKit, Combine
- MVVM / MVVM-C, Modular Architecture
- Accessibility (VoiceOver, Dynamic Type, External Keyboards)
- Core Data, AVFoundation, Core Location, MapKit
- Performance Optimization & Legacy Code Modernization

Frontend & Web

- JavaScript, HTML5, CSS3
- React (foundational), Vite
- Responsive UI, Animations, Modern CSS (Flexbox, Grid)
- UI/UX Collaboration using Figma

Backend & APIs

- GraphQL (Apollo GraphQL)
- RESTful APIs, API Integration & Design
- Django, Java Spring (foundational)
- Authentication, Error Handling, Network Layer Design

Backend (.NET & Enterprise Systems)

- C#, .NET, .NET Core
- SQL Server Integration
- Stored Procedures, Data Access Layers

- IIS Server Configuration & Administration

Databases

- SQL Server
- PostgreSQL
- MySQL
- Query Optimization & Data Modeling

DevOps & Tooling

- Git (GitHub, GitLab, Bitbucket)
- CI/CD Pipelines
- Xcode, App Store Connect, TestFlight
- Firebase Hosting & Deployment
- Agile / Scrum (JIRA, Trello)

Security

- Keychain Services
- Biometric Authentication (Face ID)
- Secure Data Storage & Encryption
- Cert Pinning
- User session, JWT.

Selected Projects

Wells Fargo Mobile Banking App (iOS)

- Contributed to the development of native iOS features for a large-scale banking application serving millions of users
- Implemented new user-facing features and improvements with a strong focus on performance, accessibility, and security
- Collaborated closely with backend, QA, Android, and design teams in an Agile environment

Tech: Swift, SwiftUI, GraphQL, Accessibility, CI/CD

CAPACITY — Enterprise Network Management Platform

- Developed a private, multi-node IT solution for managing a network of 50,000+ users
- Built custom tools and terminals to support scalability, monitoring, and operational efficiency

- Designed the system to meet strict enterprise and security requirements
Tech: C#, .NET, SQL Server, APIs, Distributed Systems
-

NOC — Multi-Platform Operations & Reporting System

- Designed and developed a private solution for real-time customer support and operational reporting
 - Integrated multiple systems and communication tools to support high-level operational workflows
 - Delivered web, mobile (iOS & Android), and REST API components
Tech: Ionic, REST APIs, Web Technologies, Mobile Development
-

EniCam — Cross-Platform Camera Monitoring App

- Developed a mobile application for real-time camera monitoring on iOS and Android.
 - Enabled users to securely view and manage live video feeds remotely
 - Focused on usability, reliability, and real-time data handling
Tech: iOS, Android, Streaming, Mobile UI
-

Languages

- Spanish: Native
 - English: C2, Fluent (TOEFL certified, 2+ years U.S. experience)
-
